PROFESSIONAL SUMMARY

Results-driven PHP Developer with solid experience in back-end and front-end development, specializing in PHP and Laravel for building scalable, secure, and maintainable web applications. Strong foundation in front-end technologies including HTML, CSS, and JavaScript, with hands-on experience in jQuery, AJAX, and SQL for dynamic data-driven interfaces.

Proficient in MySQL database design, RESTful API development, JSON data handling, and MVC architecture. Experienced in using Git and GitHub for version control, Postman for API testing, and Composer for dependency management. Demonstrates strong problem-solving abilities, clean code practices, effective collaboration, and professional soft skills, with a continuous focus on learning and improving application performance and reliability.
